Tenders for Lighting.

6. Read—Proceedings of last month relating to the disposal of tenders for lighting the Cantonment for the next 3 years.

The President having read the report of the Lighting Committee observed that the only suggestions of the Committee on which he thought it necessary to offer any remarks were that the lights should in future be maintained at an average brilliancy equal to that of 9 candles, and that the lighting contract should be given only for one year at a time: as regards the former suggestion the President was of opinion that by means of the photometer, now exhibited, the working of which seemed very simple, the power of the lights could be accurately tested and he would recommend therefore that the Committee's suggestions on this point should be adopted; as regards their recommendation to limit the time of the contract to one year he was of opinion that no person would consent to take the contract for so short a period nor would such an arrangement be fair to the contractor seeing the outlay that would in the first instance be necessary in providing the requisite amount of plant, &c., he was of opinion therefore that the contract should always be given as at present for at least 3 years; he also remarked that the present tenders now under consideration had all been submitted on the understanding that the contract would continue in force for a period of 3 years and that if the suggestions therefore of the Committee were approved of, it would be necessary either to invite fresh tenders for which there was really now no time, as the present contract expired on the 31st December, or to enter into an arrangement with the present contractor for the extension of his contract for another year. The sense of the meeting being unanimous in favor of the latter suggestion it only remained to determine the rate at which the contract should be renewed; the President proposed as it was found that the lamps would not burn for 8 consecutive hours without being trimmed and turned up, that the time of lighting should be restricted to 6 hours instead of 8 as at present, and suggested that the rate to be allowed to the contractor for each lamp per mensem should be Rs. 1—6—0. Captain Curley observed that from experiments he had carried out he was of opinion that the lighting, if maintained at a brilliancy equal to 9 candles as now proposed, could not be done under Rs. 1—8—0 per mensem; Mr. Lee who had also of late taken a considerable interest in the lighting question, having expressed himself as being of the same opinion, Captain Curley proposed the following resolution and which, having been seconded by Mr. R. P. Campbell, was put to the vote and carried by a majority of all the Commissioners present with the exception of Mr. T. T. Leonard, who dissented on the ground that in his opinion Rs. 1—4—0 per mensem would be sufficient and would leave an ample margin of profit to the contractor.

Resolution.—That the contract for lighting the Cantonment be renewed to the present contractor for a further period of one year at Rs. 1—8—0 per lamp per mensem and that the new contract should provide that the lamps be lit for 6 hours nightly and be maintained at an average brilliancy equal to 9 candles, failing in which the contractor will be liable to such fine as may be determined upon.

Plan and estimate of additional buildings for the Municipal Office.

7. Plan and estimate for the additional Municipal Offices proposed to be constructed contiguous to the Mayo Memorial Hall.

Resolved.—That the buildings should be constructed of brick in mortar instead of brick in mud as at present proposed and that the exterior of the building be designed so as to be more in keeping with the architecture of the Mayo Hall.
